

Brow Lamination

Aftercare and Maintain

- Keep brows dry for the first 24 hours; avoid washing, swimming, or steam.
- Avoid touching or rubbing the area for the first 24 hours.
- Do not apply makeup to the brows for 24 hours.
- For 48 hours after the service, avoid direct sunlight, tanning beds, saunas, and steam rooms.
- Brush brows with a nourishing oil (like castor oil) or a hydrating conditioner nightly to keep hairs conditioned.

Style your Brow

Gently brush the brow hairs and style the brows into the desired line with a mascara brush.

I also recommend using **Elleefix brow styling wax**.

Instructions:

Using a disposable mascara brush or an application brush, dip this into the pot to collect the wax.

We recommend to only use small amounts of product to avoid excess product wastage.

Gently brush the product through the brow hairs and style the brows into the desired position.

Q & A

How long does a brow lamination last?

Brow lamination results typically last 5 to 8 weeks, with the most common duration being around six weeks. The final length of time depends on factors like your hair growth cycle, aftercare routine, and the quality of the products used. To maximize the duration, follow your aesthetician's aftercare instructions, such as keeping brows dry for the first 24 hours and avoiding oily products.
